Canine First Aid Basics

Help! My dog has been poisoned!

No one ever thinks the **unthinkable** will happen to **their** dog. But the truth is that our dogs are very curious creatures and **that** can get them into trouble.

So as you're reading this article, take a moment to **get prepared now!**

#1 NEVER attempt to diagnose and/or self-treat a potential poisoning! The sooner your dog is diagnosed by a professional, the easier, less expensive and safer it will be to treat your dog.

#2 Put the contact information of your vet, the local emergency pet hospital and local Animal Poison Center in your cell phone, post it on the refrigerator; **and** share with **anyone** who cares for your dog.

#3 Also keep these numbers handy:

Pet Poison Helpline:
855-764-7661 (\$59 fee)
www.PetPoisonHelpline.com

ASPCA Animal Poison Control:
888-426-4435 (\$65 fee)

Sweet, Healthy goodness for Man's Best Friend

Just 4 ingredients and 30 minutes to bake!

Sweet Potato Fries for K9s

- 1 Sweet Potato
- 1 Teaspoon Coconut Oil (melted)
- Spices: Turmeric and Cinnamon

Preheat oven to 425° F.

Wash and peel the sweet potato. Cut into evenly-sized fry-shaped pieces.

Coat with oil and spices (mix in a large bowl or Ziploc bag).

Place fries on baking sheet in one layer.

Bake for 15 minutes. Flip over and bake for another 10-15 minutes.

Completely cool before offering to your dog!
